

Endress+Hauser at the NAMUR Annual Conference China 2019

How field instruments support the digital transformation

How can companies in the process industry exploit the potential of Industry 4.0? This question was discussed by Andreas Mayr, COO of the Endress+Hauser Group, as well as Arthur Zhang, CEO of Endress+Hauser in China, at the NAMUR Annual Conference China held on 26 and 27 June 2019 in Shanghai.

Under the motto #empowerthefield, Endress+Hauser illustrated during the conference how field instruments support the digital transformation. The company also participated in workshops with key industry representatives to discuss issues such as the digital supply chain or intelligent maintenance.

Endress+Hauser supports its customers across the entire plant life cycle by providing simple and reliable access to consistent device and process data, as well as through the use of sensor signals for diagnosis, verification and monitoring. Cloud-based asset management, as well as preventive and predictive maintenance, are viewed as promising approaches, especially in the cost-intensive operations phase.

The Endress+Hauser Group

Endress+Hauser is a global leader in measurement instrumentation, services and solutions for industrial process engineering. The Group employs approximately 14,000 personnel across the globe, generating net sales of over 2.4 billion euros in 2018.

Structure

With dedicated sales centers and a strong network of partners, Endress+Hauser guarantees competent worldwide support. Our production centers in 12 countries meet customers' needs and requirements quickly and effectively. The Group is managed and coordinated by a holding company in Reinach, Switzerland. As a successful family-owned business, Endress+Hauser is set for continued independence and self-reliance.

Products

Endress+Hauser provides sensors, instruments, systems and services for level, flow, pressure and temperature measurement as well as analytics and data acquisition. The company supports customers with automation engineering, logistics and IT services and solutions. Our products set standards in quality and technology.

Industries

We work closely with the chemical, petrochemical, food & beverage, oil & gas, water & wastewater, power & energy, life science, primaries & metals, renewable energies, pulp & paper and shipbuilding industries. Endress+Hauser supports its customers in optimizing their processes in terms of reliability, safety, economic efficiency and environmental impact.

History

Founded in 1953 by Georg H Endress and Ludwig Hauser, Endress+Hauser has been solely owned by the Endress family since 1975. The Group has developed from a specialist in level measurement to a provider of complete solutions for industrial measuring technology and automation, with constant expansion into new territories and markets.
