

One of the most innovative companies in Switzerland

Endress+Hauser takes fifth place in 2024 ranking by Bilanz, PME and Statista

Endress+Hauser is one of the most innovative companies in Switzerland. In a survey conducted by the Swiss business magazines Bilanz and PME together with the market research and data analysis company Statista, the Group specializing in measurement and automation technology ranked fifth overall and second in the electronics and industrial technology category.

“Innovation is a driver of our growth. That is why we actively promote innovation at many levels of the company,” says Dr Andreas Mayr, Chief Operating Officer and member of the Executive Board. The annual Innovators’ Meeting is an expression of Endress+Hauser’s culture of innovation. At this event, the Group honors the creativity and commitment of inventors and creates a place for meeting and exchanging ideas.

Innovation falls on fertile ground

Endress+Hauser spends over seven percent of sales on research and development. More than 1,200 employees work in this area. A program encourages all employees to report inventions. Endress+Hauser awards economically significant patents and particularly creative inventors. Prizes are also awarded for process improvements and the reuse of previously developed solutions. The aim is to anchor a culture of innovation throughout the company.

Data analysis and survey results

The “Top innovative companies 2024” ranking lists a total of 185 companies in Switzerland that have distinguished themselves as particularly innovative. The survey looked at general innovative strength, product innovation and innovation culture. For this purpose, 8,900 employees and experts were surveyed. Data from the individual companies on the number of patents registered in Switzerland and their technological relevance as well as the strength of the patent portfolio were taken into account.

The Endress+Hauser Group

Endress+Hauser is a global leader in measurement and automation technology for process and laboratory applications. The family company, headquartered in Reinach, Switzerland, achieved net sales of more than 3.3 billion euros in 2022 with a total workforce of nearly 16,000.

Endress+Hauser devices, solutions and services are at home in many industries. Customers thus use them to gain valuable knowledge from their applications. This enables them to improve their products, work economically and at the same time protect people and the environment.

Endress+Hauser is a reliable partner worldwide. Its own sales companies in more than 50 countries as well as representatives in another 70 countries ensure competent support. Production facilities on four continents manufacture quickly and flexibly to the highest quality standards.

Endress+Hauser was founded in 1953 by Georg H Endress and Ludwig Hauser. Ever since, the company has been pushing ahead with the development and use of innovative technologies, now helping to shape the industry's digital transformation. 8,700 patents and applications protect the Group's intellectual property.
